STOP NASTY COMPUTER VIRUSES NOW

ANTI-VIRUS FOR MAC

Easier, more powerful antivirus
F-Secure® Anti-Virus for Mac™ offers better protection against viruses without sacrificing your Mac performance. This new product offers excellent performance and enhanced protection against viruses, spyware, infected e-mail attachments, and other malware. Automatic updates guarantee the fastest protection against new threats. All problems are handled without disturbing the user – you only get a notification that confirms your continued safety.

Simple and effective
With F-Secure, your Mac can be secured in no time at all. Installation takes under three minutes and no reboot is required. Did you know that most Macs come with their firewall disabled? During F-Secure Anti-Virus installation process, F-Secure Anti-Virus for Mac automatically notifies you and turns on system firewall to further secure your Mac.

Protect your privacy with antispyware
Spyware can secretly track your surfing habits and profile your shopping preferences. It can even hijack your web browser or abuse your Internet connection by sending data to a third party. F-Secure Anti-Virus for Mac protects your privacy by detecting and removing such software from your computer.

Key Features

Protects your computer against viruses, worms and other malware
Real-time protection against viruses, worms, and other common malware. Automatically updated protection from the world-renowned F-Secure Labs and cloud protection against unidentified threats ensure you can safely use your computer, now and tomorrow.

Detects and removes spyware from your computer
F-Secure Anti-Virus for Mac removes secretly installed software from your computer ensuring that your system is running smoothly and clean of spyware.

Fastest Protection
F-Secure is one of the leading antivirus vendors when it comes to reaction times and update delivery times during virus outbreaks.

Easy to Install and Use

F-Secure Anti-Virus for Mac is extremely easy to install and use. As the software is highly automated, you do not have to understand the complexities of data security. The completely redesigned user interface based on extensive usability studies sets a new standard in safe Mac use.

The Fastest Protection Against Viruses

Frequent automatic updates ensure the fastest protection against new viruses and other malware. Immediate reaction times and fast cures during new and emerging threats are guaranteed by F-Secure Labs working 24 hours a day worldwide.
