SAY YES

TO BEING SAFE ONLINE

INTERNET SECURITY 2012

Say yes to being safe online. The award winning complete protection for your computer and online life.

Our brand promise, "Protecting the irreplaceable," captures the very essence of what we do and raises it to the highest level of importance. Every piece of digital content, every password, every trusted on-line relationship, is irreplaceable. F-Secure® Internet Security™ 2012 incorporates a user-centered design and offers better security online without slowing down your computer.

Several protection layers against threats
The layered levels of protection in F-Secure Internet Security 2012 provide protection from using files to browsing the Internet. The Browsing Protection feature tells you clearly which web sites are safe to enter and which to avoid. The cloud-enabled antivirus has multiple scanning engines that detect harmful files and malicious content on your computer.
DeepGuard™ cloud computing technology ensures the fastest protection against all new threats. All features can also provide protection without a working network connection, relying on local decision logic.

Protection built on reputation services
The amount of unique malware is growing fast. The amount of web sites is also growing at an amazing rate. Protection that is based solely on obtaining a copy of a malware file or analyzing a unique URL is no longer sufficient.
To make sure that you are protected against modern and complex threats, we are constantly improving our detection and protection technologies. F-Secure Internet Security 2012 can make more sophisticated and accurate decisions based on how common certain files are. With this information, F-Secure Internet Security 2012 can automatically determine if the file is malicious or not. You can also view this information whenever you need it.

Key Features

• **Computer Security and Online Safety.** Protects the content on your computer at home and safeguards you when you are using the Internet.
• **Fast and simple to use.** No need to mess around, just install and you are protected. You will not even notice it running in the background while you surf the web and enjoy your photos, music and movies.

Computer Security

• **Complete protection.** Protects your computer against all kinds of malicious attacks, stays constantly up-to-date, and uses leading edge technology to make sure you are always safe.
• **Secure firewall.** The firewall stops unwanted visitors getting into your computer via the Internet and protects you from hackers.
• **Protects your e-mail.** Blocks spam and phishing e-mails.
• **On the go.** Makes sure that you will not receive surprising bills when you are using mobile broadband.

Online Safety

• **Protection against dangerous websites.** Blocks harmful sites automatically so that you can browse the web safely without a hassle.
• **Safe surfing for children.** Parental control safeguards your children and you can have a peace of mind as a parent while they are online.
• **Personalized settings.** You can personalize settings for each person that uses the computer if you so desire.

Easy to Install and Use

F-Secure Internet Security is extremely easy to install and use. As the software is highly automated you do not have to understand the complexities of data security. The completely redesigned user interface based on extensive usability studies sets a new standard in safe PC use.

The Fastest Protection Against All Threats

Frequent automatic updates and advanced DeepGuard cloud computing technology ensure the fastest protection against all new threats. Immediate reaction times and fast cures during new and emerging threats are guaranteed by F-Secure Labs working 24 hours a day worldwide.

Software in Your Language

F-Secure Internet Security has a clear user interface, including an easily accessible electronic manual. Both the software and electronic manual are available in your language.
