

F-Secure Home Server Security 2009

Keep your Windows Home Server safe

F-Secure® Home Server Security™ automatically protects all the valuable data stored on your Windows Home Server. It integrates seamlessly with Windows Home Server, providing powerful, constantly updated automatic detection and removal of all types of malicious software. F-Secure Home Server Security is easy to use through Windows Home Server Console.

Protect your Privacy with Antispyware

Spyware can secretly track your surfing habits and profile your shopping preferences. It can even hijack your web browser or abuse your Internet connection by sending data to a third party. F-Secure Home Server Security protects your privacy by detecting and removing such software from the files accessed on your Windows Home Server.

The Fastest Protection with Automatic Updates

Antivirus software is only as good as the capability of antivirus software manufacturer to provide a timely cure for new virus outbreaks. F-Secure Anti-Virus Research Team updates virus definition databases several times a day to ensure that customers have 24-hour protection against new, fast-spreading viruses. This is why F-Secure products constantly rank at the top when compared with competing products.

Key Features

Protects your Windows Home Server against malicious software

With daily automatically updated virus protection from the world-renowned F-Secure Data Security Laboratory you can trust that the files on your Windows Home Server are clean, now and tomorrow.

Detects and removes spyware from your files

F-Secure Home Server Security removes secretly installed software from your computer, ensuring that your system is running smoothly and clean of spyware.

Fastest Protection

F-Secure is one of the leading antivirus vendors when it comes to reaction times and update delivery times during virus outbreaks.

Easy to Install and Use

F-Secure Home Server Security is extremely easy to install and use. It is highly automated so you do not have to understand the complexities of data security.

The Fastest Protection Against New Virus Outbreaks

Immediate reaction times and fast cures during new and emerging threats ensured by F Secure Research Team working 24 hours a day.

Multiple Scanning Engines

F-Secure Home Server Security uses multiple scanning engines, bringing you the very best in detection and disinfection. Each of the scanning engines is specialized in detecting a different type of malware. It is like having several antivirus products running in your computer at the same time!

Software in your Language

F-Secure Home Server Security has a clear user interface, including an easily accessible electronic manual. Both the software and electronic manual are available in your language.

Online Wellbeing Portal
