

Is your
IT security
getting
complicated?

Free your business from IT security issues

Ensuring high-level security with limited IT personnel and resources is a challenge for many small businesses. F-Secure Protection Service for Business is a solution designed to free you from IT worries so you can focus on more important work. PSB is

Easy to purchase

- All-in-one security package
- Installation & configuration by a partner
- No hardware investments required

Automated

- Always up-to-date
- World class security
- Managed by a trusted partner

PSB offers complete protection for desktops, laptops, file servers and e-mail servers. All day-to-day operations are handled remotely, so there is minimal need for on-site support.

See for yourself how easy it is: www.f-secure.co.uk/psb

Innovation, reliability and speed of response have made F-Secure one of the world's leading IT security providers since its founding in 1988. Today F-Secure's award-winning, easy-to-use products are trusted in millions of homes and businesses globally. We provide powerful real-time protection allowing computer and smartphone users to enjoy connected life.
