

NEW APPROACHES

Business security solutions 2010

F-Secure – forerunner in security since 1988

F-Secure has been developing innovative data security for over 20 years. We have introduced numerous industry firsts, including Blacklight rootkit detection technology, real-time antivirus, and the “Security as a Service” concept. We have also been pioneers in the field of mobile data security.

Today our solutions are used in millions of homes and businesses around the world. We are the global leader in selling security through ISPs, with over 200 partners worldwide. Recently F-Secure solutions have shown an excellent ability to protect against previously unknown threats, such as the widely publicized Operation Aurora and DataCrypt Trojan.

NEW SOLUTIONS FOR 2010: LIGHTER, SAFER, SIMPLER

Lighter

Reduced memory consumption and other improvements make sure our solutions have a minimal effect on system performance.

Safer

Our innovative technology will handle any issues quickly and efficiently – a fact confirmed by independent testing.

Simpler

Our solutions work quietly in the background, without disturbing your work. The redesigned user interface is extremely easy to use.

F-Secure solutions SAVE us both TIME AND MONEY.

- Marc Drion, Head of IT and Telecommunications, Clinique de l'Yvette, France.

TRUSTED BY CUSTOMERS AND PARTNERS WORLDWIDE

In our most recent survey*, our end-customers gave us an overall rating of 4,1 out of 5. You can read testimonials from satisfied customers around the world on our website. The overall partner satisfaction level was 87%. We work closely together with our partners to improve service and ensure the best results for both partners and end-customers.

Two new ways to better security

–Choose the right one for your company

Our Suite solutions offer all-in-one security for your company. They are sold either as a service or on a traditional license basis. We also offer a complete range of individual license products that you can use to further strengthen the protection offered by the Suite packages or to protect a specific part of your IT infrastructure.

LET EXPERTS TAKE CARE OF YOUR IT SECURITY:

SERVICE

F-Secure Protection Service for Business is a complete "Security as a Service" solution for companies with less than 100 users. It protects laptops, desktops, file servers and Microsoft Exchange servers against all online threats. A trusted partner monitors and manages your security remotely over the web.

IF YOU PREFER TO MANAGE IT SECURITY YOURSELF:

LICENSE

F-Secure Business Suite is a powerful all-in-one solution suitable for companies of all sizes. It reliably protects all levels of the corporate IT infrastructure: Desktops, laptops, servers, and e-mail and web traffic. Business Suite is perfect for versatile IT environments and includes efficient central management.

Client protection

Ensure uninterrupted work with high-quality protection for desktops and laptops. In addition to Windows platforms, protection is also available for different Linux distributions.

Server protection

Security solutions for servers protect against viruses and other threats, ensuring that infected computers do not spread viruses across your network. Available for Windows file servers, Citrix servers and Linux servers.

E-mail and web filtering

E-mail servers and Internet gateways are your first line of defense against online threats. Effective and accurate virus and spam filtering saves internal network bandwidth and increases productivity. Linux solutions are also available.

Central management

Policy Manager™ is a free central management and distribution tool for IT administrators. It provides an easy and scalable way to deploy and monitor security throughout your organization.

Mobile protection

F-Secure Mobile Security for Business helps protect confidential business data if a phone is stolen or lost, becomes infected with malicious mobile software, or is being spied on. Thanks to the advanced centralized management, lost and stolen phones remain under the control of IT administration.
