

ANTI-THEFT FOR MOBILE

Prevent misuse of your information

You can't always prevent your mobile from being lost or stolen, but you can make sure no one takes advantage of it. With F-Secure Anti-Theft for Mobile you can be sure that your personal and confidential information won't be misused by anyone.

Powerful features to secure your information

With F-Secure Anti-Theft for Mobile, you can remotely lock the phone and protect the information it contains with a single SMS message. If the phone is stolen and the thief changes the SIM card, the Theft Control feature locks the phone and informs you of the new number. As an ultimate safety measure to prevent misuse, it is possible to erase all the data on the phone with Remote Wipe.

Easy to upgrade

F-Secure Anti-Theft is easy to upgrade by activating the in-built automatic upgrade system which adds new security features to your solution for an additional fee. You can see the currently available additional security features directly from the solution's user interface.

HOW TO LOCK OR WIPE YOUR PHONE IN CASE OF LOSS OR THEFT?

You can lock or wipe your phone remotely with a SMS message. Remember to define your code using the Mobile Security application (antitheft settings) before loss or theft.

Also, if the SIM is changed, the thief's number is automatically reported to you.

Remote lock: #LOCK#<your code>

Remote wipe: #WIPE#<your code>
