

Online Backup

Make sure you never lose important files again

F-Secure® Online Backup™ is an easy-to-use and fully automated backup and restore solution. All your important files are stored securely online, with no limit on the amount of data. The intuitive web portal enables safe and easy access to your backed-up pictures, documents and other digital content over the Internet.

We all take regular backups of our important files, right?

Wrong. Everyone knows that taking regular backups is important but few of us have the time or the expertise required to set up a working system to take care of this important aspect of data security.

Let us do it for you - automatically

F-Secure Online Backup relieves you from having to remember to take frequent backups of your pictures, music and other important documents. It works automatically in the background, whenever you are connected to the Internet, backing up all your important data safely online. You can easily restore your files, either automatically or by selecting the files you need.

Key Features

Unlimited, secure online backup

All important files on your PC are stored securely online, with no limit on the amount of data. The files are first encrypted locally (3DES) and then transferred securely (SSL) to online data centers. Because F-Secure Online Backup stores your data online, you also safeguard your files against possible PC failure and property damage. Making backup DVDs or using external hard drives do not offer this added benefit.

Fully automatic operation

Simply install and connect to the Internet, F-Secure Online Backup will take care of the rest. You will also receive regular e-mail reports on your backup status.

Easy personal access

The intuitive web portal enables safe and easy access to your backed-up pictures, documents and other digital content over the Internet. You can also view your digital photos or play your music or videos with the built in media player.

Backup Solution You Can Trust

F-Secure has a history of 20 years specializing in IT security and has become a globally recognized player in the Internet security and mobile security markets. The company's outstanding technological innovation in the face of constantly evolving security threats has attracted both international accolades and respect within the industry.

Easy to Install and Use

F-Secure Online Backup is extremely easy to install and use. It is fully automated, working in the background whenever you connect to the Internet. It also keeps you up-to-date on your backup status with regular e-mail reports.

Software in your Language

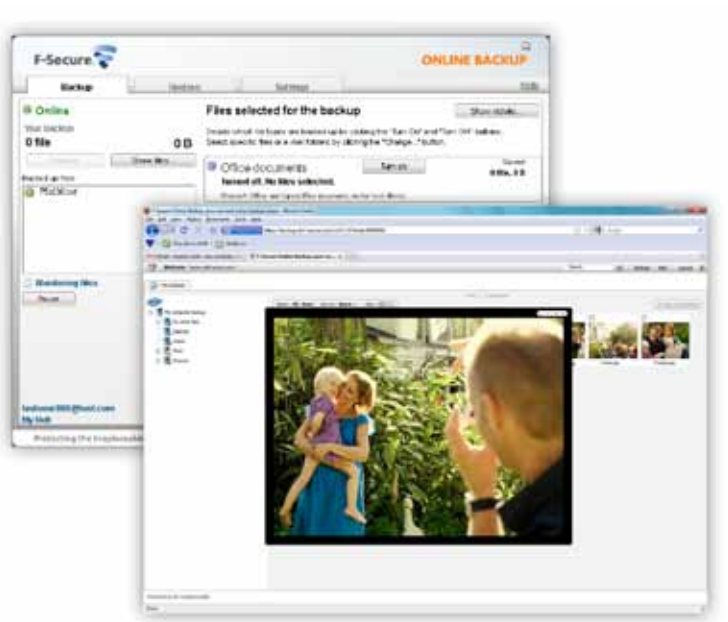

Both the software and the electronic manual are available in your language.

Supported Platforms

Windows 7
Windows Vista
Microsoft Windows XP (32-bit, SP2 or later)
Mac OS X (10.4.9, 10.5.x or 10.6.x)
