

F-Secure in Brief

Innovation, reliability and speed of response - these are the qualities that have made F-Secure one of the world's leading IT security providers since the company was founded in 1988. Today F-Secure's award-winning and easy-to-use products are trusted in millions of homes and businesses around the world. We provide powerful real-time protection that works quietly and smoothly in the background, so computer and smartphone users can enjoy the benefits of connected life to the full. F-Secure's solutions are available as a service subscription through more than 180 Internet service providers and mobile operator partners around the world.

F-Secure has a proven track record of reacting faster to imminent threats and staying one step ahead of the industry in developing protection against new online threats. Securing computers, networks and mobiles against the increasing complexity of viruses, worms, hackers and other threats calls for commitment, vigilance and intelligence. And above all, uncompromising reliability. F-Secure's aim is to enable corporates and individuals to enjoy the highest levels of permanent IT security. Delivered with outstanding ease of use and dependable support they can trust. In 2008 the company celebrated its 20th anniversary. The company's outstanding technological innovation in the face of constantly evolving security threats has attracted both international accolades and respect within the industry.

Security as a service

F-Secure has been a pioneer of the 'security as a service' business model in the industry. Partnerships with more than 180 Internet Service Providers (ISPs) and mobile operators around the world testify that F-Secure is now the global leader in this market.

By delivering security as a service, F-Secure enables companies to focus on their ongoing commercial priorities, without having to maintain the expertise and technology to cope with the constantly evolving threat landscape. Security as a service provides the strongest level of protection for the end customer – at a lower cost. Security as a service also brings new business opportunities for both business and consumer-focused ISPs and mobile operators. Backed up by our world-class technology and Service Partner support, security as a service is easy to deploy.
