**bec** FINANCIAL TECHNOLOGIES

With around 1,600 employees based in Roskilde, BEC Financial Technologies work to deliver IT solutions to Danish banks such as Nykredit, Arbejdernes Landsbank and Spar Nord. BEC's IT solutions handle DKK 2.1 million active bank customers and 6.3 million active bank accounts for over 25 banks, who therefore deeply depend on BEC's cyber security.

### Securing the cloud

BEC and the BEC banks implemented the cloud platform Salesforce, aiming to reinforce the banks' relationships and communications with their customers.

The platform handles large amounts of data, often including sensitive information about customers' personal finances, which passes between the banks and their customers. It is therefore crucial for BEC to protect this data - and at the same time the data remains clean from malicious code.

"Many people believe that Salesforce is responsible for all security. However, aspects of security are left to ourselves - e.g., when files change hands. Therefore, we must make sure to security scan everything that comes in and out of the system," explains Tonny Rabjerg, Program Director at BEC.

**ABOUT BEC**

BEC Financial Technologies helps Danish banks in all areas where IT affects their business. BEC Financial Technologies offers consulting, technology, and operating services, and develops the financial technology of the future. The development takes place in close collaboration with the company's customers, which include small, large, traditional, and niche-based financial companies.

**ABOUT F-SECURE CLOUD PROTECTION FOR SALESFORCE**

F-Secure Cloud Protection for Salesforce is F-Secure's multi-layered platform for registering and preventing attacks on Salesforce platforms. The solution provides real-time protection against viruses, Trojans, ransomware, and other advanced malware. It runs scheduled scans on content already present in Salesforce. It also prevents attacks via files and web addresses uploaded and downloaded from Salesforce. Harmful content is quarantined and analyzed for threats. Thus, the platform scans content on Salesforce that traditional endpoint protection may not reach. F-Secure Cloud Protection for Salesforce has been designed and developed in collaboration with Salesforce.

**Easy and fast implementation**

BEC surveyed three providers of IT security solutions and in February 2021, selected F-Secure Cloud Protection for Salesforce.

"We chose F-Secure because they are a serious supplier that meets all our compliance requirements. In addition, they were recommended by Salesforce because their software can be implemented easily and quickly. It's almost a plug-and-play solution," says Tonny Rabjerg.

"The collaboration with F-Secure has been good throughout the whole process. It is not uncommon for me to get involved in implementation projects because something isn't running as it should, but this time it has been completely smooth," he says.

F-Secure Cloud Protection for Salesforce scans all emails and documents in real time when they are received and sent, such as when a bank adviser has to send a contract to their client. Although the software analyzes data in real time, Tonny Rabjerg has not seen processes delayed or efficiency reduced.

"The bank advisers don't notice that advanced scanning is in progress while they are working. Of course, it's a great advantage that our IT security doesn't become a source of irritation," he says.

**IT security that accompanies development**

In addition, It is a great advantage to BEC that the Salesforce security solution does not require major updates, as has been seen before with non-cloud-based solutions.

With F-Secure Cloud Protection for Salesforce, the system is automatically updated without affecting operations and without BEC having to do anything manually.

Scan all files, URLs and emails for malware
in Salesforce cloud environments

# ABOUT F-SECURE

Nobody has better visibility into real-life cyber attacks than
F-Secure. We're closing the gap between detection and response,
utilizing the unmatched threat intelligence of hundreds of our
industry's best technical consultants, millions of devices running
our award-winning software, and ceaseless innovations in
artificial intelligence. Top banks, airlines, and enterprises trust our
commitment to beating the world's most potent threats.

Together with our network of the top channel partners and over
200 service providers, we're on a mission to make sure everyone
has the enterprise-grade cyber security we all need. Founded in
1988, F-Secure is listed on the NASDAQ OMX Helsinki Ltd.
