2021 PRIORITIES FOR EUROPEAN SECURITY LEADERS

This summary of survey results, you'll learn the influencers across Europe shared with us their priorities. See how your security stacks up.

TOP 5 PRIORITIES FOR EUROPEAN ENTERPRISES

1. Detect attacks that might have bypassed other security measures
2. Minimize your attack surface
3. Ensure your cloud is secure
4. Inegrate your visibility
5. Build a security culture

ELECTRICITY GENERATION & UTILITIES

42% of companies have a risk officer, 17% have a data privacy/data protection officer, and 16% have a compliance director. Security products and services in their organizations.

HOW COMPANY SIZE AFFECTS SECURITY PRIORITIES

- Overall, 36% of companies will increase their budget for IT/network security in 2021.
- 10% of companies will decrease their budget for IT/network security in 2021.
- 81% of companies are preparing for more detections this year.
- 28% of companies are prepared to take action against malware and ransomware attacks.
- 11-15% of companies will increase their budget for IT/network security in 2021.
- 1-5% of companies will decrease their budget for IT/network security in 2021.
- 6-10% of companies are preparing for more detections this year.
- 25% of companies are prepared to take action against malware and ransomware attacks.

INCREASE YOUR VISIBILITY.

- 3.2 Network Intrusion Detection
- 3 Network firewall
- 2.3 Network Traffic Monitoring
- 2.3 Application Traffic Monitoring
- 2 Network Intrusion Prevention

INTEGRATE YOUR VISIBILITY.

- 8 Network Security Management
- 7 Network Security Monitoring
- 6 Vulnerability Management
- 5 Incident Response
- 4 Endpoint security/antivirus for computers

MINIMIZE YOUR ATTACK SURFACE.

- 3.2 Identity and access management
- 3 Access Control
- 2.3 Privileged access management
- 2.3 Web application firewall
- 2 Network perimeter security

UNIVERSALITY OF NETWORK SECURITY SERVICES AND SOFTWARE

- 100% of companies are responsible for securing the cloud platform, while services and software providers are responsible for securing the cloud platform, while employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.

Ensuring the security of an increasingly widespread transition to remote work, emerging threats to the workplace, remote workers, and in-home users.

With the pandemic having forced a widespread transition to remote work, emerging threats to the workplace, remote workers, and in-home users.

Humans are said to be the weakest link in security, but your people also makes it easy to report malicious emails to security teams. Phishing simulation is a great way to help your employees become more skeptical of everything that arrives in their inbox. Look into a phishing simulation tool to help your team.

Phishing simulation is a great way to help your employees become more skeptical of everything that arrives in their inbox. Look into a phishing simulation tool to help your team.

Larger companies are more likely to mention detecting attacks that may have bypassed other security measures. Larger companies are also more likely to mention ensuring software vulnerabilities are handled properly.

Larger companies are more likely to mention detecting attacks that may have bypassed other security measures. Larger companies are also more likely to mention ensuring software vulnerabilities are handled properly.

The threat landscape changes year by year, and security teams must constantly adapt to keep up. Companies that are handling more data and are in more vulnerable industries are more likely to be targets of attacks.

Companies that are handling more data and are in more vulnerable industries are more likely to be targets of attacks.

Finance/Insurance

- 35% in web applications. Ensure your security.
- 55% in email and web.
- 75.0% say their budget will probably be increased.
- 30% of companies would have a risk officer, 17% have a data privacy/data protection officer, and 16% have a compliance director. Security products and services in their organizations.

The survey also found that in the past year...Midsize companies

81% of companies say their budget will probably be increased.

Nobody has better visibility into real-life cyber attacks than us. With 2000 service providers, we're on a mission to make sure everyone has the enterprise-grade cyber security we all need. Founded in 2003, f-secure has led the way in securing the modern workforce.

2020 from 9 European countries: UK, France, Germany, Belgium, Netherlands, Denmark, Finland, Norway, Sweden.

It remains to be seen whether these positive trends will result in more detections, but the aspiration across the Nordics:

- 25-199 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
- 20-49 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
- 10-19 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
- 5-9 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
- 1-4 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
- 0 employees cannot use unapproved applications, such as Office 365 and applications, such as Office 365 and applications.
