- ✓ Phone and call-back
- ✓ Chat and remote

Premium Support is our best 24/7 service for added value, provided by our experienced technical support teams, offering first-class service level.

- ✓ 24/7 *) **)
- ✓ Respond to business critical incidents within an hour
- ✓ Management level escalation
- ✓ Upgrade consultation
- ✓ Advise with malware removal

F-SECURE TECHNICAL SERVICE MANAGEMENT

A Technical Service Manager is a product expert assigned to your organization who acts as your advocate at F-Secure.

With this service, you get access to ongoing advice from someone who understands your business environment and can help with all support-related issues and escalations involving your F-Secure environment.

Your Technical Service Manager provides up-to-date information about service usage and support experience, as well as insight into upcoming product releases that matter to your organization.

Regular meetings and yearly business reviews ensure you stay up to date, making your F-Secure deployment decisions easier and more accurate.

F-SECURE PRODUCT CONSULTING & TRAINING

F-Secure product experts offer consulting projects in deployment, upgrade and management of F-Secure products and services.

- ✓ On-call services during upgrades and changes in your environment, or remote connection to assist with configurations, settings and management
- ✓ Quarterly health checks and annual updates performed on your behalf.
- ✓ Each project is separately scoped and tailored based on your business needs.

Technical product training for F-Secure products and services is offered in both self-study online training and classroom training options.

*) Local business hours languages: English, Finnish, French, German, Japanese and Swedish
