SUPPORT FOR F-SECURE® CLOUD PROTECTION FOR SALESFORCE 1.5.x ENDING

Support for F-Secure Cloud Protection for Salesforce version 1.5.x will come to an end on 16 June 2019, after which we cannot guarantee the functionality of the product series.

The replacing product is **F-Secure Cloud Protection for Salesforce, version 1.6.x**.

F-Secure is committed to supporting the latest Salesforce platform updates and providing full product compatibility with new releases before they are deployed to production environments. When changes introduced in a Salesforce platform release break compatibility, F-Secure may release new versions of the Cloud Protection application to address and fix compatibility issues.

We highly recommend that you upgrade to the newest version as soon as possible. We cannot guarantee full protection and functionality when the old product is used on a new Salesforce platform.

An up-to-date list of supported product versions and the full End-of-Life policy are available at:

http://www.f-secure.com/en/web/business_global/support/supported-products

Yours sincerely,
F-Secure Corporation
