CENTRALIZING YOUR SECURITY MANAGEMENT IS EASIER THAN EVER

F-Secure® Policy Manager™ offers tools for automating most daily operations so that you can spend less time on manual security management. It is all about staying on top of things 24/7 – effortlessly.

Policy Manager allows you to define and deploy security policies. It lets you manage your IT security applications in an easy and scalable way. You can monitor IT security, ensure compliance with corporate security policies and take action accordingly when necessary.

Best protection

F-Secure has for several years been on top of studies conducted by independent organizations. Policy Manager offers you an easy tool for managing these top-of-the-class products.

EASY AND AUTOMATED SECURITY MANAGEMENT

You can install Policy Manager in only a few minutes. Daily operations with Policy Manager are efficiently accomplished thanks to its high performance and intuitive graphical user interface.

Scalable performance

Policy Manager can be scaled from the needs of small businesses to large enterprises with tens of thousands of workstations. Regardless of size, the deployment, management and monitoring of security solutions can be done seamlessly throughout the whole organization.

The foundation of security is to have all elements in place. The elements also need to be efficiently managed – only then can you be sure of your security status at all times.

AUTOMATION OF DAILY OPERATIONS

Policy Manager is a centralized security management system. It allows your security administrators to remotely install, configure and monitor workstations, servers or even remote offices from one location. PM is an easy, efficient automation tool for daily operations such as protection of new computers and removal of disconnected hosts.

Your corporate IT administrators can centrally manage antivirus solutions as well as all critical network and content security solutions on all tiers of the network. Hierarchical admin rights allow control of access rights for multiple administrators individually. Policy enforcement settings enable the administrator to enforce compliance with corporate security policies, ensuring that end-users are protected at all times, regardless of time and place.

ACCESS THE WHOLE NETWORK

You can import the company organization structure directly from Active Directory. Security policies can be changed and distributed to the entire organization in minutes. Multiple administrators can work simultaneously and you can control their access rights individually to boost productivity.

Policy Manager offers extensive and detailed graphical reports, presenting the corporate network's current protection status in an intuitive visual format. This allows administrators to monitor and track the security and threat level in the corporate network.

POLICY MANAGER MODULES

F-SECURE POLICY MANAGER CONSOLE

The console allows users to set up corporate policies. It is an easy user interface to deploy all policy, configuration and installation files to the Policy Manager Server. IT administrators also receive alarms and alerts when security breaches are attempted but blocked.

F-SECURE POLICY MANAGER SERVER

The Server delivers new applications, upgrades, updates and policies to the hosts. All these are automatically and instantly applied in the host computer.

F-SECURE POLICY MANAGER WEB REPORTING

The detailed graphical reports allow administrators to identify computers that are unprotected or vulnerable to virus outbreaks before they actually occur. Pre-defined graphical reports make it very quick and easy to locate unprotected computers, track virus outbreaks, validate security settings and present the current security status in a visual format.

F-SECURE POLICY MANAGER PROXY

The Proxy is designed to deliver daily virus definition database updates to remote offices over slow WAN connections. The updates are transferred only once over the slow network link and distributed locally to workstations and servers in the remote offices.

THIS IS F-SECURE

F-Secure is an online security and privacy company from Finland. We offer millions of people around the globe the power to surf invisibly and store and share stuff, safe from online threats. We are here to fight for digital freedom. Join the movement and switch on freedom.

Founded in 1988, F-Secure is listed on NASDAQ OMX Helsinki Ltd.
